

T. SAI SNEHAL REDDY

Email: Snehalreddythathireddy@gmail.com | Mobile: +91-9110722121 | GitHub: github.com/snehalreddythathireddy

Career Objective

Computer Science Engineering student with strong interest in Data Science, Machine Learning, and AI-driven applications. Skilled in Python, SQL, and data analysis. Seeking internship opportunities to apply analytical thinking, problem-solving, and software development skills in real-world environments.

Experience

Development Intern — Zemoso Technologies, Hyderabad

Jun 2026 – Present

- Working as a Development Intern, contributing to software development tasks and gaining hands-on experience in real-world engineering workflows and product development practices.

Education

Bachelor of Technology – Computer Science Engineering

2023 – Present

G. Pullaiah College of Engineering & Technology | CGPA: 8.2

Intermediate – MPC

Jun 2021 – Mar 2023

PRK Junior College | Percentage: 90.5

SSC

Jun 2020 – Mar 2021

Sri Chaitanya Techno School, Anantapur | Percentage: 100

Skills

Programming Languages: Python, Java, SQL

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS

Backend Development: REST API Design & Integration, System Design Basics, SQL Databases

Data Science & Machine Learning: Pandas, NumPy, Matplotlib, Scikit-learn

Tools: VS Code, Jupyter Notebook, Git, GitHub

Soft Skills: Leadership, Problem Solving, Communication, Teamwork

Course Certifications

- AI & Machine Learning Internship Certification – SmartBridge & APSCHE (Jul 2025)
- Python Certificate – HackerRank
- Professional Fellowship in Data Science & Agentic AI Engineering (Ongoing) – AlmaBetter (Oct 2025)

Projects

Customer Churn Prediction Using Machine Learning

- Built an end-to-end churn prediction system on the IBM Telco dataset, comparing Logistic Regression, Random Forest, and XGBoost models and using SHAP for interpretability. Deployed an interactive Streamlit demo for real-time churn risk assessment.

Smart Water Tank Management System

- Developed a real-time multi-tank monitoring system with a live dashboard tracking water volume, quality, and alerts, including usage trend charts and email notifications. Deployed as a live web application with a responsive interface.

LLM-Powered RAG Question Answering System

- Built a Retrieval-Augmented Generation (RAG) system that lets users upload PDF documents and ask questions about their content, using semantic search with FAISS and free Hugging Face models. Implemented with Python, LangChain, and a simple Streamlit UI.

Exploratory Data Analysis on Amazon Prime TV Shows & Movies

- Performed exploratory data analysis on the Amazon Prime TV shows and movies dataset to uncover trends in content type, genre distribution, release years, and ratings. Used Python, Pandas, and Matplotlib to visualize key insights.
